

## Deli Tray Folding Techniques

---

### Basic Roll

Lay slice on a flat surface with narrow end closest to you. Fold that edge over about an inch onto itself to start the roll. Continue rolling, keeping edges even.

### "S"

Take a slice in your hands, and fold back and forth to create an "S" shape. If the slice is large, add an extra fold.

### Double "S"

Take a slice in your hands, and fold slice back and forth to create an "S" shape. Fold in half so the narrow ends meet.

### Ribbon

Fold slice in half lengthwise, keeping edges even. Ribbon the slice back and forth to make an "S" shape.

---

### Quarter Round

Fold slice in half, keeping edges even. Fold half moon shape in half again, keeping even.

---

### Cone Shape

Fold slice in half, keeping edges even. Tightly roll along the straight edge to create a cone. Pinch the pointed end to secure.

---

### Rectangle

Fold slice in half lengthwise, keeping edges even. Fold in half again to form a rectangle.

---

### Square

Fold slice in half lengthwise, keeping edges even. Fold right side and then left side to create a square.
