

Deli Tray Folding Techniques

Basic Roll

Lay slice on a flat surface with narrow end closest to you. Fold that edge over about an inch onto itself to start the roll. Continue rolling, keeping edges even.

"S"

Take a slice in your hands, and fold back and forth to create an "S" shape. If the slice is large, add an extra fold.

Double "S"

Take a slice in your hands, and fold slice back and forth to create an "S" shape. Fold in half so the narrow ends meet.

Ribbon

Fold slice in half lengthwise, keeping edges even. Ribbon the slice back and forth to make an "S" shape.

Quarter Round

Fold slice in half, keeping edges even. Fold half moon shape in half again, keeping even.

Cone Shape

Fold slice in half, keeping edges even. Tightly roll along the straight edge to create a cone. Pinch the pointed end to secure.

Rectangle

Fold slice in half lengthwise, keeping edges even. Fold in half again to form a rectangle.

Square

Fold slice in half lengthwise, keeping edges even. Fold right side and then left side to create a square.
